INTRODUCTION

Pemba was the first location chosen for the development of our Serviced Offices. Mahate Ridge was the place chosen for Africa Century's first business hub with stunning views and conveniently located on the main access road into Pemba.

The exterior of the office is also very important for a good working environment, African Century has brought in a landscape architect and designer to create a place in which to relax, take a call or have a coffee in shaded, comfortable garden and deck.

ACRE Serviced Offices has a professional team committed to the success of its clients, providing everything you need in an office but offering greater flexibility as you grow, than a conventional office can provide. When renting a Serviced Office at African Century Real Estate, you will have access to a modern and fully equipped office, with a reception service and a management team available for your convenience.
